Upon reviewing the tender document, we noted the requirement for submission of a tender security as a mandatory requirement Nature of a Framework Contract A framework contract establishes terms and conditions for future call-off orders and does not guarantee a specific volume or value of business to any successful bidder. Since no immediate contractual commitment or expenditure is being undertaken at the framework establishment stage, the risk that tender security is intended to mitigate is significantly reduced.</p>	<p>Tender Security is not a mandatory requirement for framework contracts</p>
